

Page 2-10

The principle of the safety-contact-mat

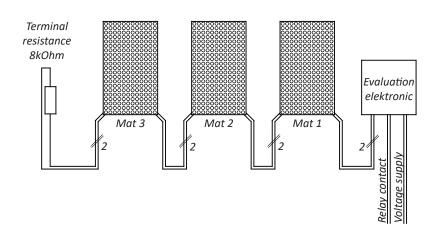

The structure

The basic construction of the ASO Safety Contact Mat consist of two conductive plates which are separated by a proprietary isolating layer. These plates are completely potted in a polyurethane material so that they are impervious to oil, water and dirt. The top consists of a slip resistant checkered pattern. This surface provides excellent resistance against oil and grease. Two cable exits are provided. These cables consist of one M8 male plug and one M8 female plug in standard construction (Optional Cable Exits are available upon request). Mounting to the floor can be realized with optional aluminum ramp rails RS 14 or BS 14.

Signal processing

The SENTIR mat safety contact mat is fitted with 2 two-core connecting cables and offers the possibility of connecting several mats in series up to a maximum total area of 10 m². One end of the cable is connected to the safety evaluation control electronics and the terminal resistance is connected to the other end (prepared at the factory). The Safety Evaluation control electronics provides monitoring for the entire circuit including the cabling route and the mats, by monitoring the terminal resistance. The two surfaces of the mat make contact when stepped on and the resistance is bridged. This immediately causes a signal within the electronics that is then given as a potential free output for the contact-mat by the relay. The entire switching circuit is monitored at the same time for damage to cable or manipulation.

Please pay attention to:

Up to 10 contact mats wired in series may be connected to one evaluation control unit.

The maximum total area can not exceed 10 m²!

- The total cable length can not exceed 25m.
- The 8.2 KΩ terminal resistance must be connected to the last mat in series when several mats are connected !
- Please inquire separately for mats with recesses or special shapes.

Ramp rail

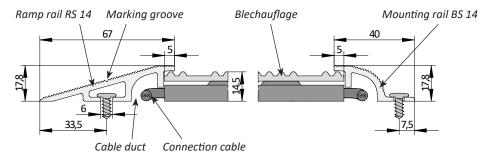

The ramp rail RS 14 provides secure mounting capability for the safety contact mat. The angled design reduces tripping and slipping when mounted to the mat. The integrated channel can be used for clean and safe installation of the connecting cable.

Mounting rail BS 14

The mounting rail BS 14 can be used to attach the safety contact mat in less accessible areas (for example at machines, shut-off positions, walls, etc.).

Also the integrated channel can be used for clean and safe installation of the connecting cable.

SENTIR mat 14 ARB (SENTIR mat 14 TBV)

Fixation sleeve

This enables the safety contact mat to be fixed to the floor without additional space being needed.

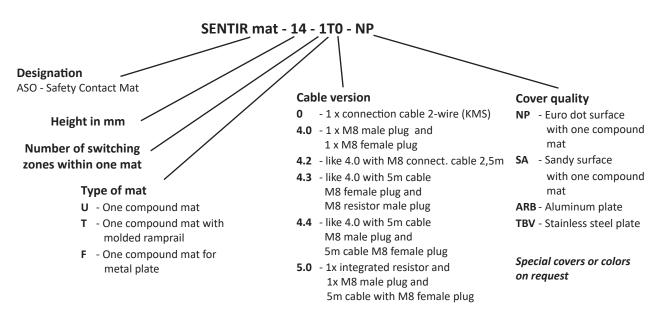

Covers

Special covers or colors on request.

- SA Sandy surface with one compound mat
- ARB One compound mat with aluminium plate
- TBV One compound mat with stainless steel plate

Type code information

Technical specifications for Safety contact mats

	SENTIR mat 14 U / ASK 14 T	SENTIR mat 14 ARB								
Max. dimension	2350 mm x 1350 mm	2350 mm x 1350 mm								
Standard dimensions available from stock	only SENTIR mat 14 U / T 1000 mm x 750 mm 1000 mm x 1000 mm 1000 mm x 1500 mm									
Construction height	14 mm with covering	14 mm with covering								
Surface	Euro dot	checkered								
Weight	U 24,9 Kg/m²; T 26 Kg/m²	approx. 31,5 kg/m ²								
Inactive border	16/42 mm	40/30 mm								
Switching pressure	Round body \varnothing 80 mm = approx. 150 N	Round body \varnothing 80 mm = approx. 150 f								
Static load	max. 2000 N over $arnothing$ 80 mm *	max. 2000 N over $arnothing$ 80 mm *								
Response time	< 25 ms *	< 25 ms *								
Switching cycles	min. 1 Millionen *	min. 1 Millionen *								
Electrical capacity	24 V 100 mA	24 V 100 mA								
Material	PUR black, 68 +/- 5 Shore A	PUR black, 68 +/- 5 Shore A								
Protection class	IP 65	IP 65								
Temperature range	-10° to +55° C	-20 C to +55° C								
Chem. resistance: Oil Fuel Solvent Acid diluted Base diluted Maintenance	good resistant sufficient resistant resistant The mat is maintenance free. Functiona	Aluminum good good good good good al testing on an annual basis is								
Connection cable	recommended. Standard: Pluggable, 2 x 0,34 PU-cover 120mm	black with M8 male/female plug,								

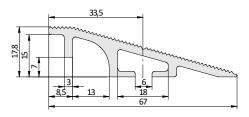

* tested according to EN 13856-1

Technical specifications for equipment

Technical specifications ramp rail RS 14

Application: Artilel-No.: Material: Standard length of delivery: Weight:

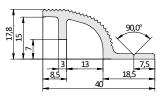

SENTIR mat 14 ARB / SENTIR mat 14 TBV 603001 Aluminum AlMgSi 0,5 3 m / 6m approx. 788 g/lm

Technical specifications mounting rail BS 14

Application: Artilel-No.: Material: Standard length of delivery: Weight:

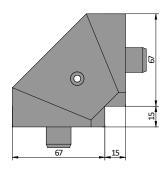

SENTIR mat 14 ARB / SENTIR mat 14 TBV 603003 Aluminum AlMgSi 0,5 3 m / 6m approx. 411 g/lm

Technical specifications corner connector EVA

Application: Artilel-No.: Material: Weight:

SENTIR mat 14 ARB / SENTIR mat 14 TBV 603020 PA 6 30% DV, black approx. 29 g/Stck.

Technical specifications checkered plate cover

icennical specifications	checkered plate cover
Application:	SENTIR mat 14 ARB
Artilel-No.:	1600028
Material:	Aluminum 2,5 mm max. 2500 x 1400 mm
Weight:	approx. 7,6 kg/m ²

Aluminum checkered plate

Technical specifications bulb plate cover Applic

Application:	SENTIR mat 14 TBV
Artilel-No.:	1600016
Material:	Stainless steel 2,5 mm
	max. 2500 x 1250 mm
Weight:	approx. 11,6 kg/m ²

Stainless steel bulb plate

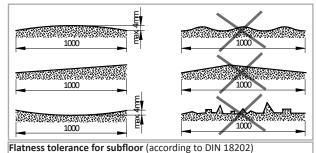

Assembly Information

The mounting surface must be absolutely even, clean and dry. Mats may not be glued on the bottom.

Lay out and position the mat correctly with the base plate downwards. Mats may not be broken or bent. Safety-Contact-Mats may not be changed in any way. Cut outs or shortening is not possible.

Please note for measurement:

The ramp rail resp. the mounting rail are used for the fixation of the mat.

To calculate the necessary space needed for the mat, the additional size of the ramp rail(s) resp. mounting rail(s) has to be added to the dimension of the safeguarded area.

	Ramp rail	additional size	mounting rail	additional size
SENTIR mat 14	RS 14 Aluminum	62 mm	BS 14 Aluminum	35 mm
SENTIR mat 14 T	molded	35 mm	- / -	- / -
SENTIR mat 14 ARB	RS 14 Aluminum	62 mm	BS 14 Aluminum	35 mm
SENTIR mat 14 TBV	RS 14 Aluminum	62 mm	BS 14 Aluminum	35 mm

Available space for safeguarding: Required Safety contact mat:

Example of calculation:

1200 x 500 mm

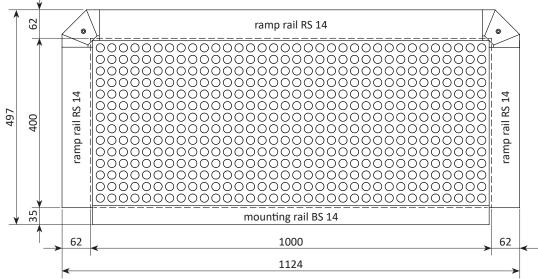

SENTIR mat 14 with ramp rail RS 14 and mounting rail BS 14

1200 mm - 62 mm - 62 mm = 1076 mm 500 mm - 62 mm - 35 mm = 403 mm

Ordering example:

SENTIR mat 14 1000 x 400 mm with RS 14 and BS 14

also with specification for positions of RS 14, BS 14 and cable outlet

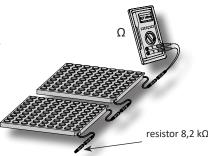

2350 mm x 1350 mm is the maximum producible size of a mat. All dimensions larger than this have to be realized by using several mats.

When installing several mats next to each other they are put together edge to edge. Then connect the mats electrically and check the resistance value.

With not activated mat the value must be 8,2 k Ω ± 500 $\Omega.$

During cable laying inside the ramp- and/or in the mounting rail pay attention that the cable is not pinched.

English

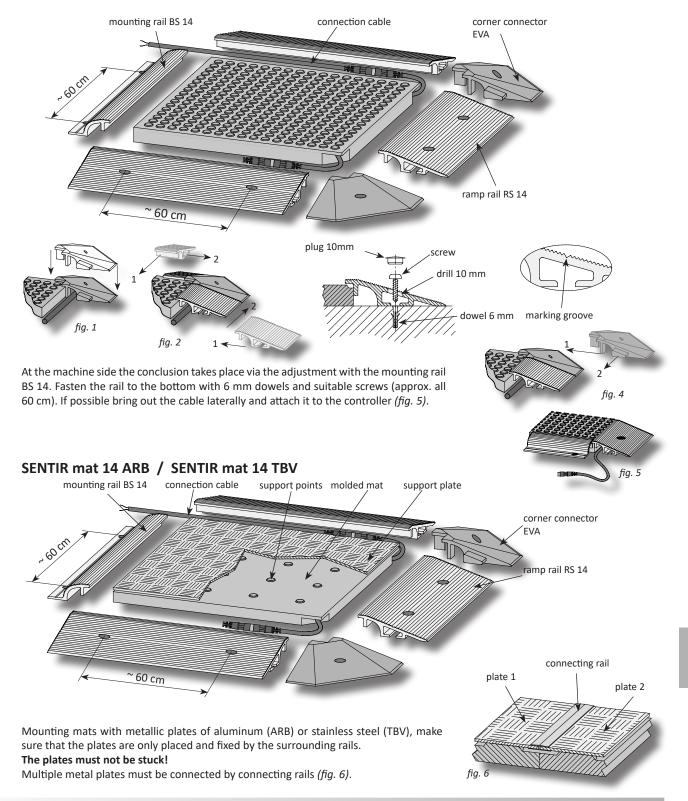

Assembly of SENTIR mat 14

When using corner connectors the ramp rail must be shortened around 20mm for each corner connector.

The corner connector nearest the cable is to be mounted from above over the cable in such a way that the cable is guided safely in the cable duct (*fig. 1*). Afterwards drill and fasten it to the bottom with 6 mm dowel and suitable screw.

Push the ramp rails laterally to the mat and then on the fixation-pin of the corner connector (*fig. 2*). Mark the fastening points along the marking groove on the rail and pre-drill 10 mm for the intended plugs. Fasten the rails on the bottom with 6 mm dowels and suitable screws (approx. all 60 cm) and close the openings with the plugs (*fig. 3*).

Push the corner connectors laterally to the mat and then the fixation-pin into the rail (*fig. 4*). Afterwards drill and fasten it to the bottom with 6 mm dowel and suitable screw.

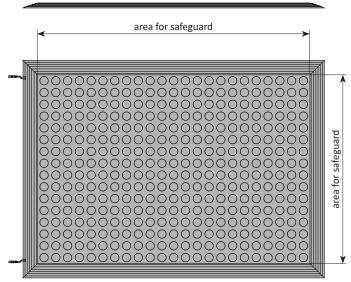

Assembly of mats with molded ramp rails SENTIR mat 14 T

Please note for dimensioning:

The area to be safeguarded is the dimensions of the mat without the ramp rails. Therefor 35mm have to be added for each ramp rail side. The result is the over-all dimension for the floor space.

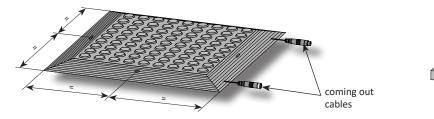

The ramp rail serves for fixation to the ground.

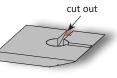

250 cm x 140 cm is the maximum producible size of a mat. All dimensions larger than this have to be realized by using several mats.

Installation

Cut out the cable output at appropriate side in that way that the coming out cables are not squeezed or sheared while placing the mat afterwards. Place and adjust the mat at appropriate place. To provide against slipping use suitable screws and dowels on each side of the mat.

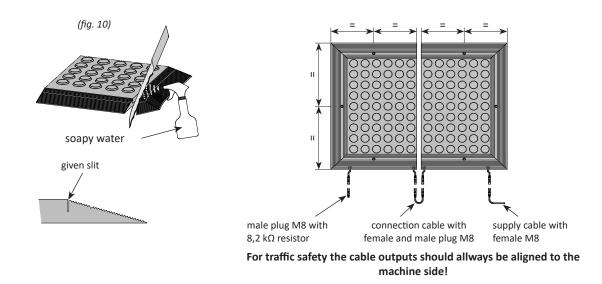

When installing several mats next to each other they are put together edge to edge. To do this cut off the ramp rail with a knife in the given slit (spray the knife and the cutting area with soapy water).

Adjust the mats and save each against getting out of place (fig. 11).

After that connect the mats electrically and check the resitance value. With not activated mat the value must be 8,2 k Ω \pm 500 Ω .

Unevenness and/or small inclusions of air which can appear on the back of the mat, do not affect the functionality of the SENTIR mat in a negative way. These kind of visional appereances are caused during the production process and can not be complained.

Storage

- SENTIR mats have to be stored dry (-20°C / +70°C)

- SENTIR mats have to be stored horizontally on a continuous even surface

- Do not stack more than 20 SENTIR mats on top of each other

1. No safety functions have been evaluated by UL 2. When the device is not supplied by Class 2 source, the input shall be protected by a fuse with a current rating of 100 divided by the supply voltage, not to exceed 5 Amps

EC - Declaration of conformity

EG - Konformitätserklärung EC Declaration of conformity (according annex II 2006/42/EC) Déclaration de conformité CE (selon annexe II 2006/42/CE)

(gemäß Anhang II 2006/42/EG)

Hiermit erklären wir, dass die nachfolgend bezeichneten Schaltleisten

We hereby declare that the following products of sensing contact edges

SENTIR mat 10 / 10T SENTIR mat 14 / 14T

zur Kombination mit den Sicherheitsschaltgeräten der Baureihe

ELMON classic 31 ELMON classic/rail 32 **ELMON** rail 34 ELMON rail 35 ELMON rail 39 ELMON classic/rail 41

aufgrund ihrer Konzipierung und Bauart sowie in der von uns in Verkehr gebrachten Ausführung, den einschlägigen grundlegenden Sicherheits- und Gesundheitsanforderungen der nachfolgenden EG-Richtlinien und Normen entspricht:

2006/42/EG EN ISO 13856-1:2013 EN ISO 13849-1:2008

EG-Baumusterprüfung Notified Body 0044 TÜV Nord Cert GmbH Langemarckstraße 20 D-45141 Essen Nr. 44 205 11 384662 002

Diese Konformitätserklärung entbindet den Konstrukteur/Hersteller der Maschine nicht von seiner Pflicht, die Konformität der gesamten Maschine, an der dieses Produkt angebracht wird, entsprechend der EG-Maschinenrichtlinie sicherzustellen.

Hersteller und Dokumentationsbevollmächtigter

ASO GmbH Hansastr. 52 D-59557 Lippstadt Lippstadt, 08.05.2014

> DIN EN ISO 9001 Erstellt: SIM

SENTIR mat 10 / 10T SENTIR mat 10 / 14T

for the combination with safety relays of the model range

ELMON classic 31 ELMON classic/rail 32 **ELMON** rail 34 **ELMON** rail 35 **ELMON** rail 39 ELMON classic/rail 41

satisfies the relevant essential health and safety requirements of the EC directives and standards listed below on account of its design and construction, as does the version brought to market by us:

2006/42/EC EN ISO 13856-1:2013 EN ISO 13849-1:2008

EC type-examination Notified Body 0044 TÜV Nord Cert GmbH Langemarckstraße 20 D-45141 Essen No. 44 205 11 384662 002

This declaration of conformity does not relieve the designer / manufacturer of the machine from his obligation to ensure that the conformity of the entire machine to which this product is attached satisfies the corresponding EC directive.

Manufacturer and attorney of documents

Par la présente nous déclarons que les produits suivants de la série barres palpeuses:

SENTIR mat 10 / 10T **SENTIR** mat 10 / 14T

en combination avec les relais de sécurité

ELMON classic 31 ELMON classic/rail 32 ELMON rail 34 **ELMON** rail 35 ELMON rail 39 ELMON classic/rail 41

de par sa conception et sa construction, ainsi que dans les modèles mis en circulation par nos soins, répondent aux exigences de base pour la sécurité et la santé des directives et normes CE suivantes :

2006/42/CE EN ISO 13856-1:2013 EN ISO 13849-1:2008

Examen CE de type Notified Body 0044 TÜV Nord Cert GmbH Langemarckstraße 20 D-45141 Essen Nº 44 44 205 11 384662 002

Cette déclaration de conformité ne délie pas le constructeur / fabricant de la machine de son obligation d'assurer la conformité de l'ensemble de la machine à laquelle ce produit est apposé selon la directive CE.
